

MF. Shaker is a typeface written in the typographic description language METAFONT. Its design draws inspiration from stencil lettering found in a book called “Shop Drawings on Shaker Furniture and Woodenware Volume 1”. As the letters were scanned at various scales, they took on differing stroke widths. These subtle inconsistencies – combined with a few imperfections – give MF. Shaker its distinctive personality and handmade feel. Currently, MF. Shaker supports a basic character set available in six cuts and as Outline-Fonts (.ttf): 1/4 INCHES (+), 1/6 INCHES (+), and 1/8 INCHES (+). In addition to these core cuts, there is a alternate cut created using a different pen: 2/6 INCHES (+).
*+ stands for a slanted cut of 12.5 degree
